

Technical data sheet

Rotary actuator with emergency control function for ball valves and butterfly valves

- Nominal torque 20 Nm
- Nominal voltage AC 230 V
- Control Open-close
- Deenergised closed (NC)

Technical data

Electrical data	Nominal voltage	AC 230 V
	Nominal voltage frequency	50/60 Hz
	Nominal voltage range	AC 195264 V
	Power consumption in operation	6.5 W
	Power consumption in rest position	3.5 W
	Power consumption for wire sizing	18 VA
	Connection supply / control	Cable 1 m, 2 x 0.75 mm ²
	Parallel operation	Yes (note the performance data)
Functional data	Torque motor	Min. 20 Nm
	Torque spring return	Min. 20 Nm
	Direction of rotation spring-return	Deenergised NC, valve closed (A - AB = 0%)
	Manual override	By means of hand crank and locking switch
	Angle of rotation	90°
	Running time motor	75 s / 90°
	Running time emergency setting position	<20 s / 90°
	Sound power level motor max.	45 dB(A)
	Position indication	Mechanical
	Service life	Min. 60,000 emergency positions

Safety notes

This device has been designed for use in stationary heating, ventilation and air conditioning systems and is not allowed to be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.

- Caution: Power supply voltage!
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied during installation.

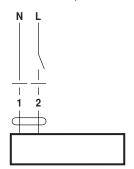

otes	
par • The • The disp	e device may only be opened at the manufacturer's site. It does not contain any ts that can be replaced or repaired by the user. e cables must not be removed from the device. e device contains electrical and electronic components and is not allowed to be posed of as household refuse. All locally valid regulations and requirements must observed.
features	
the re	actuator moves the valve to the operating position at the same time as tensioning eturn spring. The valve is turned back to the emergency position by spring force the supply voltage is interrupted.
	le direct mounting on the rotary valve or butterfly valve with mounting flange. The ting orientation in relation to the fitting can be selected in 90° steps.
	al actuation of the valve with manual elevator crank, engagement with the locking h at any position. Unlocking is manual or automatic by applying the operating ge.
	actuator is overload protected, requires no limit switches and automatically stops the end stop is reached.
Adjustable angle of rotation Adjust	stable angle of rotation with mechanical end stop.
Adjustable angle of rotation Adjus	

Notes	 Caution: Power supply voltage! Parallel connection of other actuators possible. Observe the performance data.
